

In physics **motion** is a change in position of an object with respect to time. It is typically described in terms of displacement, distance, velocity, acceleration, time and speed

At **Bevisco motion** is the **new electric** sit-to-stand height adjustable desk system.

**Motion** electric desk system allows for greater flexibility in the workplace and empowers people to easily control their environment to suit the task at hand. It makes so much sense that with our sedentary behaviour our bodies would benefit with regular musculoskeletal movement. The ability to alternate between sitting and standing during the course of the day can only be good for our wellbeing.

**Motion** electric system has an adjustment range of 650mm to 1250mm and includes an easy to use digital control panel with four memory height settings.

**Motion** is also available with manual and technician adjustment options

### Height Adjustability

Tech height adjustable frame 700mm - 1100mm

Hand crank height adjustable frame 700mm - 1150mm

Electric height adjustable frame 650mm-1250mm

### Dimensions

Minimum length: 1600mmL  
Maximum length: 2100mmL

Minimum depth: 750mmD  
Maximum depth: 800mmD

Digital control panel with four user defined preset memory height settings

### Lead Times:

5 weeks

Lead times above are indicative only. Lead times are subject to availability of materials and production capacity
