

Care and Maintenance Guide

The Care and Maintenance Guide is provided as a general guide for compliance with warranty and to allow long life of product. Please refer and adhere to all label instructions.

General: Plastics, Polypropylene, Acrylics, Synthetics, Timbers and Melamine

Use water and colorless non-abrasive liquid detergents and detergents followed by rinse with water. Chemical cleaning agents will react with plastics and will void warranty with use. Avoid prolonged contact with detergents or acidic or basic solvents. Do not use acidic or basic solvents or abrasive cleaners such as glass cleaners. Do not use mops or high pressure cleaner. Fatty substances, oils and foods will dis-color with prolonged contact with surfaces of plastics, timbers, melamine and metal and stainless steel surfaces.

General: Metals

Metal products with scratches or small spots of rust due to a lack of maintenance can be repaired by polishing the affected area, followed by antioxidant priming and color match painted surface with enamel paint.

General: Environment

Synthetic fibers, wood, stainless steels and powder-coat etc., should not be used in areas exposed to significant levels of salinity. Maintenance for synthetic fibers, textile and rattan is at least two annual cleanings to remove body oils, sunscreen oils, dust and environmental dirt that can remain in the braiding etc. Cleaning of these substances will help to avoid staining of furniture.

Weather: Prolonged Out Door Exposure

Do not expose furniture products continuously and for a long period of time outdoors. Products are suited to outdoor undercover and products sold by Vystan Interiors are sold on this basis. Australian climatic conditions will fade paint and plastics, and this is not considered a fault. Warping of outdoor tops is not covered under warranty when exposed to weather. Darker colors (including general hospitality table tops) are prone to warping. Note: out-door hospitality style tops are not completely level and is not considered a fault by the manufacturers.

Storage of Out Door Furniture

For extended life of product, store furniture in a protected place away from sunlight, humidity, saline environment, dirt and high temperatures when not in use. It is not recommended to block or cover the products. Environments exposed to salinity will reduce life span of products. Avoid storing furniture when still moist from cleaning.

Manufacture Backed Warranty

Vystan Interiors represent multiple suppliers and manufacturing houses. Our warranty is there backed by Manufacturer's Warranty and terms and conditions will vary.

Our Manufacturer's warranty extends to the normal use of the products based on the situation in which they are designed for. The warranty does not include normal wear and tear (scratches etc.) and or user abuse. All claims relating to warranty must be brought to the attention of Vystan Interiors at the earliest. Refer to Warranty 'terms and conditions' or contact our office in the first instance. Thank you
