

It's 'Australia Day', so as you read this, I am having a break from my typical working day... even though it is a public holiday for most. For me it is a day to do something I enjoy, and I do enjoy sharing our news, so here we go...

We have completed a ton of work in the past year... Our grand finale project over the Xmas Break was the supply of loose comfort furniture for the Charles Darwin University, Purple 3 refurbishment. Beautifully renovated by ASBUILD for the 'Information Technology & Management Support Unit'

CDU Purple 3

This photo showcasing building works by ASBUILD NT Reception Foyer...

Ron and I visited the project after the IT Team had moved in. This was one of those projects we both were totally impressed with ...

Purple 3 is one of the nicest refurbished spaces, moving away from polished chrome and back to warmth...

The project finishes included a lot of different wood finishes and filtered ambience with 'out of this world designer lighting'....

Some of the loose furniture items for Purple 3 ... dining chairs, tubs and lounges, ottomans, tables, meeting room furniture and accessories...

CDU Purple 3

Loose Furniture Supplied:

Modular tubs custom made
(various fabrics and leathers)

Solid Timber Side Tables

Plank Seating (Replica)

Canvas Prints

CDU Purple 3

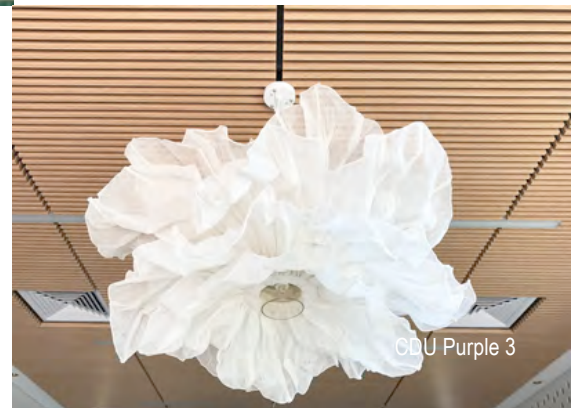

CDU Purple 3

Loose furniture supplied:

Our brand exclusive ADVANTA Leather chairs were selected to go with our custom made polished boardroom table featuring beveled edge profile

The buffet featured contrasting black oak with walnut multi-facet cut doors and stainless frame.

Just sharing some of the inner beauty of this fit-out at Purple 3 – light fixtures

< Take a closer look...

Please note
Vystan Interiors did not select, supply or install the lighting fixtures.

Designer light fixtures (by others) were used throughout the building space, heightening the design appeal...

Waterfront

Waterfront Project

Mix and Match Collection of loose furniture selected by the client.

Supply of Collaborative Furniture over two floor levels

Work Desk:
by BEVISCO – A-Frame

Comfort Booths:
New Booth design using Gabriel Medley fabrics

Waterfront

Ottoman:
Space using Gabriel Medley fabrics

Our news...

So looking back we had a great year, starting the year with two big projects NAB and JACANA.

And to end the year some great projects and jobs...

Works for Server Room Specialist, Chris Walton

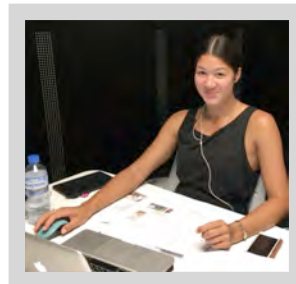

We have completed a couple of workstation and furniture project installation for Chris, so thank Chris for the opportunity to work with you again on your projects over the last six months.

Power Water Mitchell Centre Call Centre

Setting up the Call Centre over the weekend to have it operational on the Monday... thanks to NT Installers for their part of the work and to Phil at Power Water for the opportunity to work on the Call Centre job.

WADEYE Police Centre

Thanks to SITZLER Darwin for the opportunity to supply furniture for the new Police Centre and furniture for the new living quarters. This project tendered and managed by Loren.

Our team believes 2017 will be a progressive year for us.
Loren working the long hours... Such is the nature of tendering...
(Loren Hanton. Project Supervisor | Vystan Interiors)

We are in our 28th year as a family business in the commercial furniture industry and we enjoy our work more than ever...

I think a large part is mixing with good people - design teams, our clients, our suppliers and the trades... We hope 2017 will be a good year for all.

Well that's a wrap for our work news.

Our Chill Out news is on the next page

Cheryl

Our news...

Chill Out Time

Fishing is what we love.

I am once again sharing some photos of the 'big girls' Russ has caught over the past few months. All 'catch and release' of big BARRA over the magic meter.

Russ at LEEDERS, and DUNDEE fishing from the Rocks

Meet Charlotte

Charlotte has worked with us on the bigger projects and also works behind the scene. Recycling is a big part of what we do with lots of modular screen partitions to recycle at the end of their life.

This involves drilling out the screens, dismantling the screens (and glass if screen is half-glazed), recycling or dumping components and fabrics not recyclable.

Charlotte is mad keen on fishing and gets to fish with Russ and his mates.

Here Charlotte has joined Ron and Russ, taking a day off work fishing at the mouth of the South Alligator River.
